An ETF or exchange-traded fund is an investment vehicle traded on stock exchanges, much like stocks. An ETF holds assets such as stocks or bonds and trades at approximately the same price as the net asset value of its underlying assets over the course of the trading day. Most ETFs track an index, such as the **S&P 500** or MSCI EAFE. ETFs may be attractive as investments because of their low costs, tax efficiency and stocklike features.
